

Key investor information

This document is aimed at investors and contains key investor information about this fund. It is not marketing material. It is information that is required by law in order to help you understand what an investment in the fund entails and the associated risks. You are advised to read it so that you can make an informed investment decision.

Sensum Strategy Global A SEK
ISIN: SE0017859473

AIFM Capital AB,
subsidiary of AIFM Group AB

OBJECTIVES AND INVESTMENT POLICY

The fund is an actively managed equity fund that invests globally in companies that the manager deems to be of high quality. Investments are made in various sectors and have no specific geographical focus. In addition to identifying and analysing companies assessed to be of high quality, the investment strategy is based on continuously and methodically analysing the prevailing market climate. The market climate and macro indicators affect which shares the fund invests in. In the event of a change in the market climate, the fund's exposure also changes.

The fund primarily invests in shares and share-related transferable securities that are traded on a regulated market within or outside the EEA, as well as other markets in accordance with § 6.

The fund invests without geographical or sectoral limitation. Investments may, at times, be concentrated in a few sectors and geographical areas.

The fund aims to exceed its benchmark index over a five-year period. The fund's benchmark index is MSCI World Net Total Return Index USD translated to each share class's investment currency.

The fund does not pay dividends. Fund units can normally be purchased or sold on all banking days.

Recommendation: This fund may not be suitable for investors who plan to withdraw their money within five years.

RISK & REWARD PROFILE

The risk/reward indicator shows the link between risk and potential return from an investment in the fund. The indicator is based on how the fund's value has changed over the past five years. As the fund has been in existence for less than five years, the indicator is based on historical market data, supplemented with the history of relevant comparison objects.

This fund comes under category 6, which means there is a high risk of ups and downs in the unit value. Category 1 does not mean the fund is risk-free. In time the fund may move to both the right and left on the scale. This is because the indicator is based on historical data that is no guarantee of future risk/return.

The fund belongs to category 6 because the forecast standard deviation (volatility) is expected to be 15% to 25%.

The value of the fund can go down as well as up and you may get back less than you invest.

The indicator reflects risk-taking of the most important risks in the fund. It does not show the risk for:

Liquidity risk: This arises if a portion of the fund's assets are difficult to sell at a certain point in time or for a reasonable price.

Operational risks: Delays and errors in processes, political decisions and government decisions etc. may adversely affect the fund.

Currency risk: The fund invests in financial instruments issued in currencies other than the fund's base currency. As a result, the fund is exposed to the currency risk that arises from changes in exchange rates.

CHARGES FOR THIS FUND

One-off fees charged before or after you invest:

Entry charge	None
Exit charge	None

Fees taken from the fund over a year:

Annual fee	1.0%
------------	------

Fees taken from the fund under specific circumstances

Performance fee*	20% on the excess return over the benchmark index.
------------------	--

The exit charge refers to the maximum fee. Information about applicable fees is available from your distributor.

The fees are used to pay the costs of running the fund, including costs for marketing and distribution. These fees reduce the potential return from your investment. The annual fee does not include transaction-based fees or bank fees.

* Calculation: 20% on the fund's return over the benchmark index. Even in the event of a negative return, performance-related fees may be payable. This is provided that a share class's yield exceeds the benchmark index.

As the fund launched only recently, information on the annual fee is an estimate and may vary slightly from year to year. The fees reduce the fund's potential growth.

PAST PERFORMANCE

The diagram shows the historical performance in Swedish kronor after fees and when reinvesting dividends. Past performance is no guarantee of future returns. The fund is being launched in 2022.

The fund's benchmark index consists of MSCI World Net Total Return Index USD translated to the share class's investment currency.

As the fund launches in 2022, there is no historical data.

PRACTICAL INFORMATION
