This document is aimed at investors and contains key investor information about this fund. It is not marketing material. It is information that is required by law in order to help you understand what an investment in the fund entails and the associated risks. You are advised to read it so that you can make an informed investment decision.

AuAg Precious Green
ISIN Class A: SE0014808440

AIFM Capital AB,
subsidiary of **AIFM Group AB**

OBJECTIVES AND INVESTMENT POLICY

The fund is a mixed fund and invests a total of at least 90 percent in its two asset classes, companies with an emphasis on green technology and exposure to precious metals with an emphasis on gold. The fund invests at least 50 percent in the stock market to achieve exposure to companies needed for a world based on green technology where the fund's strategy is divided into four sub-strategies: production of environmentally friendly energy; reduced energy consumption, reduced emissions and recycling; energy storage; and extraction of elements needed in green technology. The fund also invests at least 30 percent in transferable securities, where value development is considered by the manager to be affected by the market development for gold but also other precious metals such as silver, platinum and palladium.

The fund invests globally without geographical limitation.

The fund aims to exceed its benchmark index over a five-year period. The fund's benchmark index is 60 percent Nasdaq Global TR Index (NQGIT) plus 40 percent Bloomberg Barclays Global Aggregate TR Index (LEGATRUU) in each share class's investment currency.

The fund does not pay dividends. Fund units can normally be purchased or sold on all banking days.

Recommendation: This fund may not be suitable for investors who plan to withdraw their money within five years.

RISK & REWARD PROFILE

The risk/reward indicator shows the link between risk and potential return from an investment in the fund. The indicator is based on how the fund's value has changed over the past five years. As the fund has been in existence for less than five years, the indicator is based on historical market data, supplemented with the history of relevant comparison objects.

This fund comes under category 5, which means there is a high risk of ups and downs in the unit value. Category 1 does not mean the fund is risk-free. In time the fund may move to both the right and left on the scale. This is because the indicator is based on historical data that is no guarantee of future risk/return.

The fund belongs to category 5 because the forecast standard deviation (volatility) is expected to be in the range of 5% to 25%, mostly in the range of 10% to 15%.

The value of the fund can go down as well as up and you may get back less than you invest.

The indicator reflects risk-taking of the most important risks in the fund. It does not show the risk for, e.g.:

Liquidity risk: In the event of extreme circumstances on the stock market, there is a risk of not being able to withdraw money from the fund within the set time.

Counterparty risk: The risk of losses due to a counterparty being unable to fulfil its obligations in accordance with the agreed terms, for example not delivering securities or cash and cash equivalents.

Operational risks: Delays and errors in processes, political decisions and government decisions etc. may adversely affect the fund.

Currency risk: As the fund invests globally, the value development of each share class is also affected by changes in value between currencies.
