WHAT IS THE PRODUCT?

Type: Mutual fund

Duration: The fund has no maturity date. The Fund Management Company has the right to close the fund and redeem the shares.

Objectives: The fund is an actively managed equity fund that invests globally in companies that the manager deems to be of high quality. Investments are made in various sectors and have no specific geographical focus. In addition to identifying and analysing companies assessed to be of high quality, the investment strategy is based on continuously and methodically analysing the prevailing market climate. The market climate and macro indicators affect which shares the fund invests in. In the event of a change in the market climate, the fund's exposure also changes. The fund primarily invests in shares and share-related transferable securities that are traded on a regulated market within or outside the EEA, as well as other markets in accordance with § 6. The fund invests without geographical or sectoral limitation. Investments may, at times, be concentrated in a few sectors and geographical areas. The fund aims to exceed its benchmark index over a five-year period. The fund's benchmark index is MSCI World Net Total Return Index USD translated to each share class's investment currency. The fund's return is determined by how the value of the holdings in which the fund invests increase or decrease during the holding period. The fund does not pay dividends. Fund units can normally be purchased or sold on all banking days.

Target group: This fund may be suitable for savers who plan to keep their investment for at least five years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no certainty that the entirety of the capital invested can be recovered. No special prior knowledge or experience with mutual funds or financial markets is required in order to invest in the fund.

Other: The Depository: Skandinaviska Enskilda Banken (publ). The annual report, half-year report, information brochure, latest share values, and other practical information are available free of charge in Swedish at <https://aifmgroup.com/sensum-strategy-global/>

WHAT ARE THE RISKS AND WHAT RETURNS CAN I ACHIEVE?**Risk indicator**

The summative risk indicator provides guidance on the level of risk of this product compared to other products. It shows how likely it is that the product will decrease in value due to market developments. We have classified the product as level 3 out of 7, i.e. a medium risk class. This means that the fund has a medium risk of increases and falls in the share value. The indicator primarily reflects increases and falls in the shares the fund is invested in. Risks that are not captured by the risk indicator include: Liquidity risk: In the event of extreme circumstances on the stock market, there is a risk of not being able to withdraw money from the fund within the set time. Operational risks: Delays and errors in processes, political decisions, and government decisions etc. may adversely affect the fund. Currency risk: As the fund invests globally, the value development of each share class is also affected by changes in value between currencies. This product does not include any protection against future market performance. You may therefore lose all or part of your investment.

WHAT HAPPENS IF THE FUND CANNOT MAKE ANY PAYOUTS?

By law, the fund's assets may not be held by the Fund Management Company. Instead, each fund must have a special depository that takes care of holding the fund's assets. In the event that the Fund Management Company goes bankrupt, the management of the fund is taken over by the depository. There is no compensation or guarantee scheme for investors in the fund.

WHAT ARE THE COSTS?

The person who advises you on or sells the product may charge for other costs. If so, the person in question must inform you of these costs and how they affect your investment.

Costs over time

The tables show the amounts taken from your investment to cover different types of costs. The amount depends on how much you invest, how long you hold the product, and how your product performs. The amounts shown here are based on an example investment amount and different possible investment periods.

We have assumed the following: The first year you get back the amount you invested (0% annual return). For five years, we have assumed that the product performs in accordance with the neutral scenario. SEK 100,000 is invested.

	If you redeem after 1 year	If you redeem after 5 years
Total costs	SEK 980	SEK 6,724
Annual cost impact*	0.98%	0.98%

(*) This illustrates how costs reduce your return each year during the holding period. For example, it shows that if you redeem after the recommended holding period, your average return per year is estimated to be 11.72% before costs and 10.74% after costs. In recognition of their services, the person who sells the product to you may receive a portion of the costs that you pay to us. You will receive information about the amount.
